Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicant's representatives present remarks pertaining a proposed amendment (attached). The terms "larger" and "smaller" in the claim were discussed, and would be modified in a more clear form by specifying the length of the header pipe of the larger heat exchanger is longer than the header pipe of the smaller heat exchanger in a direction of the elongation of the tube. It appears that such modification would define the claim over the reference to Heraud. Upon submission of a proper amendment, the application will be subjected to an updated search and consideration.

Alexandria, VA 22313-1450

This Agenda is submitted for the telephone interview scheduled for Monday, June 5, 2006 at 2:00 P.M. E.T. The undersigned proposes discussing independent Claim 1.

CLAIM FOR DISCUSSION

1. (Proposed amendment) A vehicle heat exchanger comprising:
a larger heat exchanger and a ~~frontmost~~ smaller heat exchanger overlapped with each other in a direction of airflow, each heat exchanger comprising:
heat exchanger tubes arranged side by side with each other;
outer fins interposed between neighboring heat exchanger tubes; and
header pipes connecting and communicating with both ends of the heat exchanger tubes for heat-conducting media to circulate through the heat exchanger tubes and the header pipes; and
a reservoir in communication with one of the header pipes for reserving one of the heat-conducting media and being fixed to a header pipe of the larger heat

exchanger at a position beyond the overlap between the larger and smaller heat exchangers,

wherein the reservoir is located behind a plane extending through an intake of the ~~frontmost~~ smaller heat exchanger, wherein the airflow is introduced into the intake, and wherein the reservoir is located alongside the header pipe of the larger heat exchanger.

REMARKS

The proposed amendment to Claim 1 clarifies that the reservoir is fixed to a header pipe of the larger heat exchanger at a position beyond the overlap between the larger and smaller heat exchangers.
